

# INVESTIGATION MANUAL

FOR  
NON-TRADITIONAL GROUPS

CONFIDENTIAL

Dear Investigator:

The following pages have been assembled as an investigation tool plus as a training aid based on past cases the author has been involved in working.

All the questions are designed to help give direction and aid toward solving cases and leading to prosecution. The items when filled in on the attached pages will further aid the prosecutor in court and in sentencing.

The last part of the GUIDE BOOK will aid in looking at the elements of the crime and setting culpability of the person under investigation. It will assist in directing investigative leads toward either the possibility of a conspiracy or organized criminal activity case.

I do suggest that while this GUIDE BOOK will aid you in your case objectives, use it as only part of your investigation not the total of your effort. It is designed to help. Further, if you need any form of assistance those questions and data filled in this booklet will be known in advance and help can be obtained that much quicker.....

Should upon completion of this form you have questions, call and I will be glad to assist. If I do not know the answers, I will be glad to at least point you in the direction of seeking a qualified person to answer your problem. The cases you wish to discuss will be kept in confidence. I will use my 25yrs of police work and the benefit of my research to help you.

Best Wishes:
